DETAILED ACTION

Response to Amendment

1. This action is in response to the amendment mailed September 25, 2003.

Claims 1 was amended and claim 2 was canceled rendering claims 1 and 3-16 pending.

New Matter - 35 U.S.C. 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 1 and 3-16 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In instant claim 1, the phrase 'a polyolefin-free crystallizable thermoplastic' is not supported by the specification.

Claim Objection

4. Instant claim 1 is amended to include 'a polyolefin-free crystallizable thermoplastic which has been selected from the group consisting of polyethylene terephthalate, polybutylene terephthalate, and polyethylene naphthalate.' This

Art Unit: 1774

amendment is objected to because according to the McGraw-Hill Dictionary of Chemical Terms a polyolefin is a polyethylene. It is unclear how claim 1 can be polyolefin-free and simultaneously comprise polyethylene and polybutylene material, which are defined as polyolefins. Furthermore, Kim et al. defines polyolefin resins as polyethylene and polypropylene (column 2, lines 10-12).

Claim Rejections – 35 USC § 103(a)

5. Claims 1, 3-7 and 12-16 rejected under 35 U.S.C. 103(a) as being unpatentable over Kim et al. (U.S. 5,660,931) in view of Srinivasan (U.S. 6,309,987) for reasons previously stated in the Office Action submitted on February 12, 2003. Regarding the newly added limitation to claim 1, 'a polyolefin-free crystallizable thermoplastic which has been selected from the group consisting of polyethylene terephthalate, polybutylene terephthalate, and polyethylene naphthalate,' Kim shows a white film comprising polyethylene terephthalate (crystallizable thermoplastic) (column 1, line 58 through column 2, lines 12).

Claim Rejections – 35 USC § 103(a)

6. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kim et al. (U.S. 5,660,931) in view of Srinivasan (U.S. 6,309,987) further in view of Tono et al.

(U.S. 6,410,122) for reasons previously stated in the Office Action submitted on February 12, 2003.

Claim Rejections – 35 USC § 103(a)

7. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kim et al. (U.S. 5,660,931) in view of Srinivasan (U.S. 6,309,987) further in view of von Meer (U.S. 5,660,931) for reasons previously stated in the Office Action submitted on February 12, 2003.

Claim Rejections – 35 USC § 103(a)

8. Claims 9 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kim et al. (U.S. 5,660,931) in view of Srinivasan (U.S. 6,309,987) further in view of Yamazaki (U.S. 6,106,924) for reasons previously stated in the Office Action submitted on February 12, 2003.

Response to Arguments

9. Applicants arguments of rejection under 35 USC 103(a) as being unpatentable over Kim et al. (U.S. 5,660,931) in view of Srinivasan (U.S. 6,309,987) have been considered but are unpersuasive. Applicant states claim 1 has been amended to further include the film is "polyolefin-free", where it is evident that Applicant's film does not contain any polyolefins.

Art Unit: 1774

Additionally, in instant claim 1, the phrase 'a polyolefin-free crystallizable thermoplastic' is not supported by the specification. This amendment is objected to because according to the McGraw-Hill Dictionary of Chemical Terms a polyolefin is a polyethylene. It is unclear how claim 1 can be polyolefin-free and simultaneously comprise polyethylene and polybutylene material, which are defined as polyolefins. Furthermore, Kim et al. defines polyolefin resins as polyethylene and polypropylene (column 2, lines 10-12). Applicant states the claims have been amended to define the thermoplastic as polyester.

Examiner respectfully disagrees because claim 1 was amended to define the thermoplastic as polyethylene terephthalate, polybutylene terephthalate, and polyethylene naphthalate and not polyester. Applicant argues the combination of Kim and Srinivasan is improper because Kim describes a blend or mixture of a polyester and polyolefin to make synthetic paper and Kim cannot be modified by eliminating the polyolefin. Examiner maintains that Kim is not being modified by eliminating polyolefin; however, because Kim et al. defines the polyolefin as polyethylene, Kim et al. meets Applicant's instantly claim limitation of a crystallizable thermoplastic being selected from the group of polyethylene terephthalate. Applicant argues the instantly claimed film does not contain polyolefin; however polyethylene is defined as a polyolefin.
